

Cultural association “i313” is a non profit all female organization that carries out outdoor free film festivals in high immigration districts in the town of Turin and neighboring areas.

In the past years we specialized in conception and realization of transcultural projects meant to create occasion of encounter, acquaintance and exchange among indigenous and migrating inhabitants of a same territory.

Our initiatives are inspired by community cinema philosophy: they are motion picture paths that conjugate artistic and cultural experience with social, relational and community dimension.

The most important project we’ve realized in the past years is “Cinemainstrada” festival.
